WI-HP-DWF INSTALLATION INSTRUCTIONS

- Insert the 1/2" threaded hex nipples into the filter head. Do not use pipe dope.
- The installation parts provided are for a 3/8" compression connection to the water supply, which is the most common size in use. You may require additional or different fittings/connections, which have not been include.
- Turn off the water under the sink to the dishwasher.
- Unhook the water supply to the dishwasher.
- Attach to the filter-housing top the 2 stainless steel braided hoses. Do not over tighten.

- **Locate a suitable location for the HousePure DWF (dish washer filter) that allows relocation to facilitate the periodic cartridge changes and connection to the water supply source and water hook up to the dishwasher.**
- **Connect the “out” water line hose to the dishwasher supply line (this may require the use of the 3/8” connector fitting).**
- **Turn on the dishwasher and check for any water leaks. If there are no leaks enjoy sparkling dishes and stem ware from your dishwasher.**
- **If you have water leaks turn off the dishwasher and tighten the fittings to stop the leak. Restart your dishwasher and re check for leaks. Hopefully you have none and can now begin enjoying sparkling dishes, gleaming stemware and begin to restore the brand new looking interior of your stainless steel dishwasher.**
