

EVERHOT® LVH720HC/LVH1120HC

SUPPLEMENTAL INSTALLATION INSTRUCTIONS (See red colored numbers on installation instructions and modify as noted below)

Note: If you have any questions regarding these instructions, call our Service Department at 800-322-9283 extensions 112 or 115 **BEFORE** proceeding with the installation.

- # 1 Clear is changed to tan santoprene tube
- # 2 Parts list has changed as follows:

One Faucet, one EverHot Tank Assembly, one 3/8" x 5/16" Quick-Connect Reducing Union with check valve, one escutcheon with o-ring, one metal special washer, one piece santoprene tube with clamp.
- # 3 Insert O-ring into groove in escutcheon, and place onto faucet tubes. Install faucet assembly into mounting hole.
- # 4 Number 4 is changed as follows:

Install metal special washer onto faucet shank. Install nut onto shank and tighten. Install santoprene tube onto end of shank at least 1/2". Apply clamp to top of tube and squeeze until tight.
- # 5 Before final tightening of the washers as discussed in #4, be sure you have positioned faucet spout in the desired direction.

6 Ignore "FIG. 1"

7 Number 7 is changed as follows:

*To fill hot tank, rotate hot side handle forward and let run until water flows out of the spout. (Note red dot or red and blue dots near faucet bottom to identify hot and cold side of faucet) *

*** Failure to follow this step will cause permanent damage to the heating tank. Tank must be filled with water prior to plugging in the power cord. "Dry start" damage to the heating tank is not covered by the product warranty.**

The Everhot® mark is used under license from Bradford White Corp.
