The following finishes are available upon request: Biscuit (29), Bone (66), Black (31), and White (52). All are Omega Powder coated finishes.

Lead Time for all finishes is 8 to 10 weeks

Polished Chrome and PVD Finishes:

the current industry state-of-the-art technology for Lifetime anti-tarnish & anti-abrasion finishes -- Physical Vapor Deposition (PVD). PVD coating exhibits the highest brilliance, the most exceptional hardness, the most excellent scratch resistance and the most superior anti-tarnish protection available in designer faucetry today.

Tiger and Omega Powder Coated Finishes: Until the advent of PVD finishes, these powder coatings provided the greatest protection against tarnish available in the industry. Still extremely hard and reliable, powder coating bonds tightly to the underlying brass providing a smooth and clear yet tough and flexible coating generally impervious to air and moisture for years.

Living Finishes (LF) and Uncoated Finishes: Living finishes may be plated with metals or have oxidizing agents applied to achieve a craftsman's finish. Such finishes require more careful use and upkeep, but deliver the true mellow, antique appearance valued by designers and architects. The finish frequently changes with touch, may oxidize, and may make each part unique. Warranted for workmanship only.

Precious Metal Finishes: The epitome of tradition and beauty, precious metal finishes represent the ultimate elegant lifestyle. Available both coated for extra tarnish resistance and durability and uncoated (Polished Gold) due to natural tarnish resistance, precious metal finishes are not recommended for extreme use installations and should always receive the utmost care and maintenance.

**ALL SPECIAL FINISH ORDERS ARE:
NONRETURNABLE, NONREFUNDABLE, AND MAY BE NONCANCELLABLE.**
