In 2001, the FDA approved the use of Ozone commercially for food processors to kill food-borne pathogens. Now, Water, Inc. brings Ozone technology into your kitchen, right at your fingertips!

**BENEFITS OF OZONE**

- **Natural & Chemical-Free:** Ozone cleans food without chemicals such as chlorine*
- **Better Quality Food:** Ozone does not alter the taste or appearance of food
- **Safer Food:** Ozone reduces pesticides and chemical residues on food.
- **Longer Shelf Life:** Ozone reduces microorganisms on the surfaces of produce

*Studies show that Ozone acts 3,000 times faster than chlorine at 100 times the strength.

**WITH A 10 SECOND RINSE:**

**Bodycote Tested**

Keep your food bacteria-free. Wash your meats, hands, dishes, baby bottles and toys with ozonized water to kill bacteria.

**Keep food fresh**

Extends the life of fruits, vegetables, meat and flowers by 2-3 times.

**Remove over 75% of pesticides**

Tap water alone will not remove pesticides. Simply rinse your food in ozonized water to remove pesticides from the surface of fruits and vegetables. Cleans hard-to-wash fruits such as strawberries and grapes.

**Kill over 99% of bacteria**

**SGS Certified**

BONUS: includes 2 faucet tip styles! available in chrome or satin nickel

(turn page for more details)

part numbers:
- WI-FAOZONE1-CH (chrome)
- WI-FAOZONE1-SN (satin nickel)

The ozone faucet, ozone generator, and both faucet tip styles shown are included.
