3M is committed to compliance with Proposition 65 regulations. Based on current process and understanding, 3M Separation and Purification Sciences Division (SPSD) has not applied a Proposition 65 warning to the product(s) noted above.

California Proposition 65 is a risk-based regulation that requires warnings for exposures from substances known to the State of California to be carcinogens or reproductive toxicants (*i.e.*, CA Prop. 65 List). The new Proposition 65 requirements allow companies to provide relevant Proposition 65 information by a variety of methods. For more information on Proposition 65 regulatory changes, please see the OEHHA website.
