### Performance Data Sheet

**Model:** Body Glove BG-1000

Use Replacement Cartridge BG-1000C

The concentration of the indicated substances in water entering the system was reduced to a concentration less than or equal to the permissible limit for water leaving the system as specified in NSF/ANSI Standard 42 and Standard 53.

**System tested and certified by NSF International against NSF/ANSI Standard 42 and Standard 53 for the reduction of substances listed below.**

*Based on the use of Cryptosporidium parvum oocysts

**Application Guidelines/Water Supply Parameters**

| Service Flow | 0.75 gpm (2.8 lpm) |
| Water Supply | Potable Water |
| Water Pressure | 25 - 125 psi (172 – 862 kPa) |
| Water Temperature | 40º F - 100º F (4.4º C - 38º C) |

**Note:** While the testing was performed under standard laboratory conditions, actual performance may vary.

Replacement Cartridge: BG-1000C. For estimated costs of replacement elements please call 1-800-322-9283 or visit our website at www.waterinc.com

**WARNING**

To reduce the risk associated with ingestion of contaminants:
- Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before and after the system.
- Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts. EPA Establishment Number 070595-CT-001

**CAUTION**

To reduce the risk associated with property damage due to water leakage:
- Read and follow Use Instructions before installation and use of this system.
- Installation and use MUST comply with all state and local plumbing codes.
- Do not install if water pressure exceeds 125 psi (862 kPa). If your water pressure exceeds 80 psi, you must install a pressure limiting valve. Contact a plumbing professional if you are uncertain how to check your water pressure.
- Do not install where water hammer conditions may occur. If water hammer conditions exist you must install a water hammer arrester. Contact a plumbing professional if you uncertain how to check for this condition.
- Do not install on hot water supply lines. The maximum operating water temperature of this filter system is 100º F (38º C).
- Protect filter from freezing. Drain filter when temperatures drop below 40ºF (4.4ºC). The disposable filter cartridge must be replaced every 6 months, at the rated capacity or if a noticeable reduction in flow rate occurs.
