Filter system shown includes head and cartridge. Cartridges also available separately.

An accessory filter faucet is required and sold separately.

Call toll free: 1-888-62-REUSE for a recycle kit with a pre-paid UPS label.

**REDUCES:**
- Chlorine Taste & Odor
- Chloramines
- Cloudiness, Sediment, Rust**
- Giardia Lamblia Cysts
- Cryptosporidium Parvum Cysts
- Molds and Algae*
- Lime Scale*
- Asbestos Fibers
- Oxidized Iron**
- Oxidized Manganese**
- Oxidized Sulfides**
- 0.5 Micron Particulate Reduction
- Lead
- Total Trihalomethanes (TTHMs)
- Volatile Organic Chemicals (VOCs)
- Methyl Tertiary-Butyl Ether (MTBE)
- Phenytoin
- Naproxen
- Estrone
- Ibuprofen
- Bisphenol A
- Nonyl phenol

Body Glove’s filter cartridges use a pre-filter wrap and a patented carbon block that, in combination, help trap sediment particles, chlorine taste and odor and other contaminants. This leading-edge, engineered media helps deliver cleaner, more sediment-free water resulting in improved drinking, cleaning and cooking water.

**ENVIRONMENTALLY PREFERRED:**
Body Glove’s water filtration systems are designed with the environment in mind by:
1) reducing the number of plastic water bottles discarded into landfills,
2) using recyclable materials in packaging and
3) providing an easy method to recycle the filtration cartridges.

**RESPONSIBLE LIVING:** Body Glove is a leader in the recycling revolution. Purchasing a Body Glove filter allows raw materials from the filter to be recycled, reducing landfill waste and saving resources.

Flow Rate - 0.75 GPM
Capacity - 1,000 Gallons

**Micro-Filter Technology**

Body Glove’s filter cartridges use a pre-filter wrap and a patented carbon block that, in combination, help trap sediment particles, chlorine taste and odor and other contaminants. This leading-edge, engineered media helps deliver cleaner, more sediment-free water resulting in improved drinking, cleaning and cooking water.

System Tested and Certified by NSF International against NSF/ANSI Standards 42, 53 and 401 in model BG-12000 for the reduction of:

**Standard 42 - Aesthetic Effects**
- Chemical Reduction
- Chlorine Taste & Odor
- Chloramines
- Mechanical Filtration
- Particulate Reduction - Class I

**Standard 53 - Health Effects**
- Chemical Reduction
- Lead
- MTBE
- VOC
- TTHM
- Mechanical Filtration
- Cysts
- Asbestos

**Standard 401 - Pharmaceuticals:**
- Emerging Compounds / incidental contaminants
- Phenytoin
- Ibuprofen
- Naproxen
- Bisphenol A
- Estrone
- Nonyl phenol (pending)

Simple yet effective pressure relief valve reduces water release during filter changes.

Patented Quick-Change valve design with integrated shut-off valving affords simple filter changes.

Body Glove’s Micro-Filter Technology includes patented carbon block technology to help reduce chlorine, taste and odor.

Pre-filter wrap reduces sediment and other particulate matter while helping protect the carbon media.

Plastic filter housing is certified by NSF to meet NSF Standard 42 Structural Integrity requirements. And, the housing can be recycled by calling toll free: 1-888-62-REUSE.

KDF-55 filtering media provides Lime Scale and Bacteriostatic control.

Body Glove’s Micro-Filter Technology includes patented carbon block technology to help reduce chlorine, taste and odor.

Body Glove incorporates a patented Integrated Membrane Pre-ACTivated Carbon (IMPACT) Technology. This filtration technology blends the high-efficiency of carbon media with the durability of a micro-porous membrane filter into one single pharmaceutical-grade cartridge. This unique process dramatically reduces pressure drop, and increases flow rates. For the consumer, this translates into longer cartridge life while eliminating the need for additional pretreatment.

The Body Glove BG-12000 Filtration System incorporates an innovative filtering design that combines four filtering processes into one recyclable polymer filter housing. Water is first treated by KDF-55 media for bacteriostatic and scale control. Next, a Micro-Filter-Wrap more evenly traps sediment particles while maintaining overall flow rates. Water is then filtered by a patented 0.2 micron pharmaceutical-grade membrane. Lastly, the filtered water passes through a patented, high-efficiency carbon block to reduce unpleasant taste and odor concerns. The Quad-Stage Filtration System helps provide a more comprehensive drinking water filtration process.

Body Glove Water Filter Systems install easily under your sink.
