**HousePure® Secure 3/4”**

**MODEL** | **DESCRIPTION**
---|---
**HousePure® Secure** Tankless Water Heater Protection | Part # WI-HP-SECURE-.75L (water entry left side)  
Part # WI-HP-SECURE-.75R (water entry right side)  
Utilizing Siliphos Polyphosphate  
Recommended for all Tankless Water Heater Manufacturers

**LEVEL 1. Tankless Water Heater Scale Prevention.**
Provides annual protection against costly water heater scaling and sediment build-up. Polyphosphate media prevents (sequesters) water hardness from scaling on flash heating surfaces. A 5-micron filter reduces sediment, which can cause additional scaling throughout the hot water line. The unique micro-fiber filter construction delivers higher filtration efficiency and flow rates. Ideal for indoor and outdoor installations (not for below freezing temperatures). Features a 3/4” NPT inlet/outlet with a differential filter-change gauge for peace-of-mind.

Includes mounting bracket, filter-change flow indicator gauge & filter-change spanner wrench

Max Flow Rate: 9 GPM  
Dimensions: Width: 5.25” Height: 25.75” Depth: 5.5”

Filter Capacity: One year or when flow gauge or timer indicates change needed

Incoming Water Temperature Range: 40°F to 100°F

Tools Required: Teflon® tape (do not use pipe dope), adjustable wrench, tube cutter, suitable pipe fittings and inlet gate valve

**YOU CHOOSE!**  
RIGHT or LEFT water entry side

Water, Inc filter change indicator included

---

**HousePure® Secure Replacement Cartridge**  
Part # WI-HP-SECURE-.75C

The HousePure Secure cartridge should be changed annually or when flow gauge indicates a change is needed sooner.

Utilizing Siliphos Polyphosphate

Capacity: One year or when gauge indicates change needed

Dimensions: Height: 20” Diameter: 2.5”

Included: replacement lubricated o-ring & filter change indicator.

Replacement Cartridge for HousePure® Secure 3/4” tankless water heater filter system. The 5-micron filter with polyphosphate scale reducing media provides consistent flow rates and superior filtration performance.

Recommended for all Tankless Water Heater Manufacturers

---

**MAXIMUM recommended line pressure for this product is 75 PSI. Pressure above 75 PSI indicates the absence of a properly functioning water pressure regulator at the property. Excessive water pressure poses a risk of property damage to you. Problems due to excessive water pressure are NOT covered by this product’s warranty. BEFORE installation of any Water, Inc. product, confirm that water supply pressure does not exceed 75 PSI. Questions? Contact Water, Inc. Service Dept. at 800.322.WATER(8283)**
